Environmental Management Policy

TS&B acknowledges and values the importance of protecting environmental resources and recognising obligations, both locally and internationally. Through its planning and practice, TS&B is committed to bringing about improved environmental practices and a greater awareness and understanding of environmental sustainability.

TS&B defines the principles of environmental sustainability as following:

- Facilitate and enhance the decision-making process by seeking opinions, feedback and participation from the stakeholders on environmental management issues for manufacturing and product handling processes.

- Promote and encourage environmental awareness and responsibility among all staff members and local and overseas suppliers.

- Strive for ongoing improvement of environmental performance by identifying, addressing and mitigating environmental risk.

- Decision making processes to effectively incorporate economic, environmental, social and equity considerations.
